T Vaishnavi Devi

Web Developer

Hyderabad, India +91-6304124667 vaishnavitalluri2000@gmail.com | Linkedin

Web Developer with 3+ years of experience specializing in React.js and modern web development. Skilled in building responsive, SEO-friendly Single Page Applications (SPA) with a strong focus on performance optimization, accessibility, and user experience (UX).

Experienced in component-based architecture, REST API integration, and Agile/Scrum workflows, delivering scalable and maintainable web solutions. Currently expanding expertise in Python, FastAPI, and Artificial Intelligence to contribute to intelligent, data-driven applications.

RELEVANT WORK EXPERIENCE

Futureview Systems 2025 – Present

Web Developer

- Developing a React.js-based frontend for a financial services platform that delivers AI-powered insights similar to a conversational assistant.
- Building interactive dashboards to present agent data, invoices, payment details, and financial summaries in a clear, user-friendly manner.
- Implementing data visualization using charts and conversational UI components to help clients easily understand complex financial information.
- Integrating LLM-driven features to generate brief and detailed responses based on agent and transaction data within the application.
- Writing and maintaining unit and integration tests to ensure component reliability, data accuracy, and stable feature releases.
- Designing reusable React components, reducing duplicate code and improving maintainability by 30%.
- Ensuring responsive and accessible UI across devices using modern CSS practices and mobile-first design principles.
- Collaborating in an Agile/Scrum environment, participating in sprint planning, daily stand-ups, reviews, and task tracking.
- Actively contributing to UX improvements by organizing dashboards, optimizing data flow, and enhancing overall usability.

Medicover Hospital, Hyderabad 2023 – 2025

Web Developer

Project Name: Medicover Hospital Website

- Prepared complex user interfaces and data interactions within a strict deadline in collaboration with 2+ designers and 5+ developers.
- Developed an interactive, responsive PHP-based website connected to a MySQL database. Implemented PHP logic to improve performance by 20%.
- Web Optimization with Page-speed insights (lighthouse), Wave Web Evaluation Tool increase performance by 25% faster.
- Minimized Core Web Vitals – FCP, LCP, TBT, CLS by 20%.
- Applied on-page SEO techniques like optimized headings, alt attributes, and meta descriptions to improve crawlability and indexing.
- Used schema markup and structured data to enhance search engine visibility, resulting in better ranking for targeted health-related keywords.
- Website link: Medicover Website

Project Name: Next.js Landing Pages – Medicover Hospitals

- This is a Next.js framework project to build interactive, responsive web application boosting load time and

run time by 20%. Used form submission.

- Developed form submission using fetch API integration, increasing reporting accuracy by 20%.
- Implemented dynamic routing and server-side rendering (SSR) to improve SEO and enhance performance on low-bandwidth devices.
- Used Tailwind CSS for consistent, scalable, and mobile-friendly UI across landing pages.
- Collaborated with the marketing team to launch 5+ targeted landing pages for lead generation campaigns, contributing to a 15% increase in user conversions.
- **Technologies Used**: React.js, Next.js, Tailwind CSS, Fetch API, REST APIs, SSR, SPA, SEO Optimization.

Project Name: Sprint Diagnostics Website

- Streamlined data manipulation processes using MySQL, increasing reporting accuracy by 10%.
- Collaborated with UI/UX designers to implement a mobile-responsive layout, improving user engagement on mobile devices by 25%.
- Implemented SEO best practices and meta tags to enhance search engine visibility and increase organic traffic.
- Improved indexing and boosted search impressions by 15% using Google Search Console insights.
- **Features:** Responsive Design, SEO Best Practices, Google Search Console Optimization, Mobile Optimization, Fast Load Times.
- Website Link: Sprint Website

Project Name: 10 Specific Websites

- Project Description: Built 10 responsive and interactive websites using HTML5, CSS3, and JavaScript, focusing on user experience and clean UI.
- Integrated features like Blogs, Appointment Booking, and Contact Forms to enhance functionality and user engagement.
- Implemented form validation and basic JavaScript interactivity to improve user experience and input accuracy.
- Demonstrated ability to manage multiple projects simultaneously with consistent UX quality.

Gaint Tech Information Technologies Internship 2022 – 2023

Frontend Developer and Scrum Master

- Worked on designing and developing interactive dashboards to visualize employee progress, task status, and performance metrics.
- Built responsive UI layouts using HTML5 and CSS3, ensuring compatibility across desktop and mobile devices.
- Designed reusable UI components, reducing duplicate code and improving maintainability by 30%.
- Collaborated with team members in an Agile/Scrum environment, participating in sprint planning, daily stand-ups, and task tracking.
- Assisted in improving user experience (UX) by organizing dashboard content for better clarity and usability.
- Coordinated tasks as a Scrum Master, helping the team meet sprint goals and deliver features on time.

SKILLS

- **Technical Skills** : Responsive Design, Web Performance, Frontend Development.
- **Frameworks and Libraries** : React.js, Next.js, Angular Js(Basics).
- **Programming Languages** : JavaScript, TypeScript (Basics), Python (Basics).
- **Web Technologies** : HTML5, CSS3, SASS.
- **Version Control** : Git, GitHub.
- **SEO & Web Optimization** :
    - Technical SEO, On-Page SEO
    - Google PageSpeed Insights (Lighthouse)
    - WAVE Web Accessibility Evaluation Tool
- **Project & Task Management** : JIRA, Dice.

- **UI & Styling Tools** : Babel, React Bootstrap, Tailwind CSS, Bootstrap 5.2.
- **Agile & Project Management** : Scrum, Sprint Planning, Daily Stand-ups, Retrospectives, Jira Reporting.
- **Design & Marketing Tools** : Canva, Figma (Basics), SEMrush.

EDUCATION

Siddhartha Institute of Engineering and Technology (JNTUH)
Computer Science and Engineering — 2022

TOOLS AND PLATFORM

- JIRA, Dice
- Git, GitHub
- SEMRush

Certifications

- Certification of Completion of Basic Web Development.
- Certification of Completion of Node.js and React.js.
- Certification of Participation in Artificial Intelligence, Machine Learning and Deep Learning.
- Certification from SETWIN as Desk Top Publishing.
- Certification of Merit in NLTSE.
- Certification of Completion of Claude 101 by Anthropic
- Certification of Completion of Introduction to Claude for Coworkers by Anthropic
